Berlino, lì 22. Novembre 2005

Oggetto: Conferma di partecipazione al bando di concorso per la riqualificazione del Piazzale Valdo Fusi, Piazza Carlo Emanuele II e Aiuola Balbo.

Egregio Signor Ratti,
Egregio Signor Sassi,

grazie per il gentile invito al bando di concorso indetto per la riprogettazione delle piazze Valdo Fusi, Calo Emanuele II e dell'aiuola Balbo. L'area ci sembra di grande interesse e saremo lieti di poter partecipare.

Come richiesto, Le inviamo in allegato un breve *Curriculum Vitae* della Prof. Kiefer e delle attività dello Studio Kiefer. Per guadagnare tempo le inviamo il materiale per posta elettronica (la qualità delle immagini purtroppo ne risente un poco). Nel caso in cui fosse necessario una copia cartacea, non esiti a volerci contattare in modo da potergliela spedire al più presto per posta.

Per quanto concerne la presentazione dello studio Kiefer, la Prof. Kiefer sarà lieta di poter illustrare i suoi nuovi lavori e soprattutto il suo metodo progettuale. La pregerei di voler comunicare, possibilmente in tempi brevi, la data di quest'incontro in modo da evitare possibili conflitti con altri appuntamenti.

L'occasione è gradita per porgere cordiali saluti.

Tancredi Capatti

BURO KIEFER was founded as a Landscape Architecture Studio in Berlin at the end of the eighties by Landscape Architect Gabriele G. Kiefer and nowadays works with a staff of about 15 persons. The main goal of our work consists in landscape architectural projects of a broad variety in themes and dimensions. Public plazas and parks, outside spaces of residential and office housing, schools, day care centres and roof gardens. In the last years amongst a sery of projects for former military and industrial areas, public urban parks have been the main topic of our interest and work.

The studios design philosophy is based on open space being one of the last categories to achieve a "contrasting world" in our time of globalization, speed and worldwide information. Resulting from this approach our design strongly deals with clearness, reduction and a transformed relation to the existing surrounding of the site. Perceptible space itself becomes the main characteristic.

Selection of Projects

1989
Restricted urban development realization competition for the Kaiser-Friedrich- / Pestalozzistraße housing development, Charlottenburg, Berlin; Architect: Marina Sankovic, Berlin; 1st Prize
